NATIONAL DISTRICT  
HEATING  
ASSOCIATION

VOLUME XX

NUMBER 1

OCTOBER 15, 1934

## District Heating In Paris

In the October 15, 1930 issue of the Bulletin there was an article published on "District Heating in Paris," by Mr. Phillippe Schereschewsky. In reply to our request for information as to how the construction of this system has progressed, Mr. Schereschewsky has advised that the well-known economic condition has required the curtailment of their expansion program.

However, he has sent the very interesting construction pictures published in this issue, which show some of the difficulties which they encounter, and their methods of construction. More information will be published in later issues of the Bulletin.

The new construction work scheduled for completion in May, 1934 will reach customers approximately 9200 feet from the boiler plant.

## Corrosion in Heating Systems and What to Do About It

By J. H. WALKER, Chairman, Corrosion Committee

The N. D. H. A. Corrosion Committee has been in existence for several years, and I sometimes have a feeling that the members of the Association would be justified in calling us to account as to what we have actually done to help their corrosion troubles. It is perfectly true that for a number of years the Committee tried several approaches to the problem without finding out much about it except that it is
