Indoor Air Quality: Looking Into the Challenge

Featuring

If District Energy is So Good, Why Isn’t it in Place?

Burn That Trash!

Sweden’s Aggressive Waste Management Efforts

Acting to Chart DHC’s Future

Special Insert: 1987-1991 Index of Articles

and more...
Index of Articles

District Heating and Cooling Magazine

Proceedings of the Annual Conferences

Proceedings of College/University Conferences

Proceedings of Cooling Conferences
Index of Articles

Have you ever wanted to find a technical paper or an article portraying a DHC project in a certain city or country? Do you want help searching through the numerous IDHCA publications for exactly what you need? The cumulative index below details every article which has appeared in the quarterly "District Heating and Cooling" magazine; and in the Proceedings of the Annual Conferences, the College/University Conferences, and the Cooling Conferences. The index covers 1987 through 1991.

Annual Conferences

25th UNICHAL Conference in Budapest, Hungary

78th Annual Conference in Baltimore, MD

79th Annual Conference in Chautauqua, NY

80th Annual Conference in Virginia Beach, VA
Surf’s Up!...At Virginia Beach, 4th Quarter 1988, p. 32.

82nd Annual Conference in San Francisco, California
City by the Bay Hosts Dynamic Annual Conference, 1st Quarter 1991, p. 11.

UNICHAL Congress 1989 in Graz, Austria
Cogeneration

Cogeneration at the University of Western Ontario, 4th Quarter 1987, p. 29.

Cogeneration: The Precursor to Cogen Power?, 1st Quarter 1987, p. 15.

District Heating and Cogeneration: Vital Elements of the Danish Energy System (see DHC (Foreign)).

How to Make a Cogeneration Project Happen, 1989 Annual Proceedings, p. 150.

Integrating a Cogeneration Facility into an Existing District Heating and Cooling Central Plant, 1990 Annual Proceedings, p. 89.

Saving Our Atmosphere: DHC and Cogeneration Can Make A Difference (see Environmental Issues).

Steam Wheeling and Cogeneration for a Toronto Hospital, 1991 Annual Proceedings, p. 45.

World Class DHC with Cogeneration for the New Shinjuku Area, 1991 Annual Proceedings, p. 55.

College/University

Advantages/Disadvantages - Central Chilling Economics in a Campus Setting (Kent State University), Third College/University Proceedings, Section F.

The Application of Thermal Storage and Cogeneration at CUNY (see District Cooling).

A Case History - Computer Model of a Chilled Water System, First College/University Proceedings, Section C.

Cogeneration at the University of Western Ontario (see Cogeneration).

Computer Analysis of Steam Systems, First College/University Proceedings, Section E.

Decentralized Chilled Water Facility at Rutgers University, First College/University Proceedings, Section D.

Development of a Central Chilled Water System at Auburn University, Third College/University Proceedings, Section F.

Efficiency Plan Underway at University of Ottawa (see Efficiency and Conservation).

Geographic Information Systems as Related to Undergraduate Utilities, Third College/University Proceedings, Section C.

Heating and Cooling the Ivory Tower: IDHCA’s First College/University Conference Wins Top Marks, 2nd Quarter 1988, p. 15.

College/University Con't

Importance of Turndown and Density Compensation to Accurate Steam Measurement, Third College/University Proceedings, Section B.

Infrastructure Design for the College of Staten Island (see District Cooling).

The McMaster Plan: Tailoring an Oversized System for Summer Use, 3rd Quarter 1987, p. 16.

Managing Steam, Third College/University Proceedings, Section A.

Modeling for Steam Plant Optimization, Third College/University Proceedings, Section B.

Practical Communication for the Physical Plant Manager, 3rd Quarter 1987, p. 18.

Princeton University Chilled Water Plant Expansion, First College/University Proceedings, Section B.

Thermographic Applications in Plant and Utility Systems, Third College/University Proceedings, Section D.

Utilities Infrastructure Development on the University Campus, 1989 Annual Proceedings, p. 12.

Utility Rate Setting in a University Environment, Third College/University Proceedings, Section E.

Variable Speed Frequency Drives for HVAC Applications - Modern Technologies and Applications, Third College/University Proceedings, Section E.

Yale University District Cooling System's Capacity and Operations Improvements (see District Cooling).

Youngstown State University: A Commitment to the Community, 3rd Quarter 1987, p. 12.

District Cooling

5th Annual Cooling Conference of the IDHCA

6th Annual IDHCA Cooling Conference in Omaha, Nebraska

Assisting the Customer/User to Comply with Contract Flow and Temperature Differential Requirements, 1991 Cooling Proceedings, Section II.

The Case for Freecool - A Conceptual Design of a 200,000 Ton District Cooling Scheme Using 39 Degree Water from Lake Ontario, 1991 Cooling Proceedings, Section IV.

Central Chiller Plant Modernization and Expansion, 1990 Cooling Proceedings, p. 35.

CFC Update, 1990 Cooling Proceedings, p. 89.

CFCs and Alternatives for Water Chilling, 4th Quarter 1989, p. 6.

CFCs and Alternatives for Water Chilling, 1989 Cooling Proceedings, p. 73.

Cooling Plant Operations, 1991 Cooling Proceedings, Section I.
DHC System Using Ammonia Chillers and Ice Thermal Storage, 1991 Cooling Proceedings, Section VI.
District Cooling: A Hot Item for the '90s, 2nd Quarter 1990, p. 6.
Extended Temperature Range as a Strategy to Reduce Cost of District Cooling (see Economics and Financing).
Getting District Cooling Started, 2nd Quarter 1990, p. 25.
Innovative New Cooling Tank Revolutionizes District Energy System in Trenton (see DHC System Profiles).
Optimizing Primary Pumping in a Large Chilled Water Distribution Network, 1991 Cooling Proceedings, Section IX.
Pumping Ice, 1989 Cooling Proceedings, p. 171.

Trends and Aspects in District Heating: The View from Denmark, 2nd Quarter 1987, p. 29.

DHC System Profiles

Case History - District Cooling - Louisville Medical Center, 1986 Annual Proceedings, p. 455.
Century City: A City Within the City of Los Angeles, 3rd Quarter 1989, p. 7.
Con Edison’s Applepower Rebates Ripen Cooling Market, 2nd Quarter 1990, p. 11.
Cooperation at the Cooperative: Rebirth of Rochester’s Steam System Delivered by a Most Unlikely Coalition, 1st Quarter 1989, p. 6.
Development of District Heating in Buffalo, New York, 2nd Quarter 1987, p. 11.
DHC Alive and Well in the West, 1st Quarter 1988, p. 11.
DHC Has Strong Holds in Northern California, 1st Quarter 1991, p. 4.
District Heating in Philadelphia: 100 Years and Growing, 4th Quarter 1987, p. 17.
Fine Tuning Hones a Competitive Edge in Detroit, 2nd Quarter 1989, p. 17.
The Future of DHC in Kansas City: Boom or Bust?, 4th Quarter 1987, p. 27.
Harrisburg Steam Works: Up and Running, 4th Quarter 1987, p. 11.
Increased Pressure Brings Valued Comfort to Mile High City (Denver), 4th Quarter 1990, p. 41.
Kansas City Steam: From Beginning to End—and Back Again, 4th Quarter 1990, p. 25.
Lincoln Centre: Comfort and Satisfaction Through DHC, 1st Quarter 1991, p. 22.
Mid-America (Indianapolis) Starts a Winning Tradition, 3rd Quarter 1991, p. 4.
Milwaukee Brewer Steps to the Plate with District Steam, 4th Quarter 1989, p. 13.
Seattle Steam: Still Not Acting Its Age at 95, 2nd Quarter 1988, p. 6.
Trigeneration Brings Cost and Energy Savings to Nassau County, 2nd Quarter 1991, p. 4.

Economics and Financing

Development of Low-Cost, Desiccant-Based DHC Systems (see DHC-Domestic).
Facing the Facts: The Real Cost Per Kilowatt-hour for Air Conditioning, 2nd Quarter 1990, p. 41.
The Incentive Rate Story, 1988 Annual Proceedings, p. 6.
John Kuhns, President and CEO of Catalyst, Tells Why His Firm Believes in DHC, 1st Quarter 1987, p. 20.
Economics and Financing
Con't

- Thermal Storage: Synergy and Savings (see District Cooling).

Efficiency and Conservation

- Cooling Tower Conservation Checklist (see District Cooling).
- DH Coordination with Local Industries for Economic and Environmental Improvements, 1991 Annual Proceedings, p. 117.
- District Heating for the Benefit of a Better Environment and of Reduced Fuel Input (see District Heating).
- Integration of a Desiccant Cooling System with a STAG Turbine and an Absorption Refrigeration Cycle to Meet the Total Annual Energy Requirements of Small- and Medium-Size Communities, 1991 Annual Proceedings, p. 489.
- Iola Powerhouse: Monroe County Optimizes Fuel-Use Strategies (see DHC System Profiles).
- Real Boiler Efficiency: Clearing Up the Questions, 1st Quarter 1990, p. 31.

Environmental Issues

- Canada's Response to Environmental Challenges of the '90s-The Green Plan, 3rd Quarter 1991, p. 16.
- CFCs and Alternatives for Water Chilling (see District Cooling).
- The Clean Air Act Amendments of 1989 (see District Cooling).
- District Heating for the Benefit of a Better Environment and of Reduced Fuel Input (see District Heating).
- Environmental Impact on Cooling Tower Design, (see District Cooling).
Test Your CFC IQ!, 4th Quarter 1990, p. 5.
Today’s CFC Political Situation (see District Cooling).
Using Storage and Heat Load Forecasts to Reduce DH Costs and Pollutants (see District Heating).

Heat Exchangers

Application of Plate and Frame Heat Exchangers in Customer Locations, 1991 Cooling Proceedings, Section VIII.

Governement:
Congress, DOE, HUD, Municipal, Foreign

Canada’s Response to Environmental Challenges of the '90s-The Green Plan (see Environmental Issues).
Congress Watch on the Environment (see District Cooling).
Congressman Green Discusses DHC, 1st Quarter 1987, p. 23.
David Gatton: Keeping an Eye on Congress, 3rd Quarter 1987, p. 31.
District Cooling Studies Show Development Promise, 4th Quarter 1990, p. 33.
DOE R&D Progresses with Industry’s Helping Hand (see R&D/New Technology).
DOE’s Millhone, 1st Quarter 1990, p. 17.
### Legal Issues

- State Laws and Regulations, 4th Quarter 1988, p. 27.
- Sweet Success for Seattle Steam: Court Overturns Phone Company’s Heat Damage Claim, 1st Quarter 1988, p. 25.

### Marketing

- District Heating and Cooling Rates: Balancing Marketing Objectives with Cost of Service (see Economics and Financing).
- Estimating Market Penetration of New District Heating and Cooling Systems Using a Combination of Economic Cost and Diffusion Models (see Economics and Financing).
- Marketing Committee Workshop in Nashville, 2nd Quarter 1987, p. 32.
- Selling DHC: In Your Opinion, Do You Feel...?, 2nd Quarter 1989, p. 25.

### Metering

**Piping, Distribution, and Fluids**

Advanced Fluids: The Benefits are REAL, 4th Quarter 1989, p. 33.

The Case of the Mysterious Manhole Moisture, 3rd Quarter 1987, p. 36.

Corrosion Coating of Underground Pipelines Used in Energy Distribution Systems, Third College/University Proceedings, Section C.

Efficient Heat Distribution - Pre-insulated Pipe Systems for District Heating and Cooling, 1986 Annual Proceedings, p. 21

The Importance of Removing Condensate from Steam Lines, 1989 Annual Proceedings, p. 64.

Leak Detector May Be Sound Investment, 3rd Quarter 1988, p. 23.

Make Regulator Limitations Work For You, 1st Quarter 1989, p. 15.

Mastering Change in Water Treatment for the '90s, 1st Quarter 1991, p. 13.

The Obsolescence of Steam Traps, 1989 Annual Proceedings, p. 20.

On-Site Condensate Monitoring - A Tool for Determining the Effectiveness of Condensate Treatment Programs, 1990 Annual Proceedings, p. 337.

DHC Using Ground Water Heat Pump, Ice Thermal Storage and Ammonia Refrigerant Technologies (see Thermal Storage).
Pumping Ice (see District Cooling).

Quality

Using Steam Quality and Steam Purity as a Marketing/Sales Tool (see Marketing).

R&D/New Technology

Advanced Fluids: The Benefits are REAL, 4th Quarter 1989, p. 33.

Project Synopsis: District Heating and Cooling Technology Selection and Characterization (see Government - Congress, DOE, HUD, Municipal and Foreign)

Update on International and ASHRAE Research, 3rd Quarter 1991, p. 38.

**Thermal Storage**

The Application of Thermal Storage and Cogeneration at CUNY (see District Cooling).

**Waste Fuel Energy**
