HEATED BY STEAM.

A Novel Scheme Proposed for The City of Lockport Warmed by the Holly System.

And Some Wicked Prognostics by the Grumbler Element.

A correspondent from Park Grove, Lockport, writes to the Journal and Courier to say that he has been reading with interest of the Holly system of heating by steam, and would like to know if it is practicable for the city of Lockport. He says: "I have been told that the Holly system is in use in Rochester, and that it is a success. Is it? Can it be used in Lockport? Would it be a success here? Would it be cheaper than coal? Would it be cheaper than gas? Would it be cheaper than wood? Would it be cheaper than coal oil? Would it be cheaper than electricity? Would it be cheaper than natural gas? Would it be cheaper than anything? Would it be cheaper than nothing? Would it be cheaper than the present system of heating? Would it be cheaper than the present system of heating by steam? Would it be cheaper than the present system of heating by steam in Lockport? Would it be cheaper than the present system of heating by steam in Lockport by the Holly system?
