
WATER WORKS—AUBURN AHEAD.—We learn that the contract for the construction of Water Works in the city of Auburn was on Thursday let to L. S. Hobbie & Co., of this city. The work is to be commenced immediately. We are informed that the entire stock of the Auburn Company was taken within twelve hours after the subscription books were opened. While all the cities and important villages round about are actively moving toward, or have already accomplished the important remunerative work of securing artificial supplies of water, Rochester remains in the background. It is hoped, however, that the ensuing season will witness another vigorous movement in this direction, and the consummation of the long talked of and inexplicably deferred enterprise.—[Roch. Dem.]
