

**THE WATER WORKS.**—The work of laying the mains and branch pipes of the Auburn Water Works Company is nearly completed, and the water will be finally turned on in a few days. Upon a trial of the works a few days since, it was found that out of some six miles of pipe there were but six or eight leaks—a most successful indication of the perfection of the work. The Superintendent expresses himself as more than satisfied with this result, it being usually necessary to provide against a far greater leakage than has occurred from the pipes of this Company.
