

---

**PERSONAL**,—H. W. Chittenden, Esq.,\* and Superintendent Tillinghast went to Buffalo from the east yesterday.

Mr. Trautwane, engineer for the bondholders of the Rochester Water Works Co., left for New York last night. He has been here making an examination of the work to report to his employers. He has nothing to do with the company or construction.

---

**WATER! WATER!**—It will be observed by a report of the proceedings of the Council, that it is not deemed expedient to attempt to get water for winter use through the Water Works Company. The Council resolved to take steps to procure a partial supply from the Aqueduct street mill race, and directed the committee to look for a further supply. There will, we trust, be no delay in this matter.
